**ABOUT ME**

I am a 20+ year UA member. I have worked positions as a service plumber up to a site superintendent controlling over 130 men in a foreign country.

You might've met me at the Apple spaceship project in Cupertino. I was a site superintendent for Kinetics

From there I went overseas to build an Intel plant and when I returned, I went to SLAC to build the largest cryogenics plant in the United States. I'm now working at Tesla.

**None of these jobs would have been successful without the skilled UA labor and planning.**

In this class I want to talk about planning, team building, how to stay organized and problems on the job site. All these topics can make your life much easier at work

## Job Site Foreman Tips & Tricks

## Journey Level Continuing Education

**Fall Semester 2021**  
September 14 - September 30, 2021  
Tuesdays & Thursdays 5PM - 7PM  
2 HOUR CLASS, 6 NIGHTS

## Job Site Foreman Tips & Tricks

This class will be taught live on the Zoom platform

**COURSE DESCRIPTION**

In this class we will talk as a group and review situations (also known as "Problems") that have happened on the job site, how to correct them and prevent them by planning and working as a team.

**OUTCOMES**

Students will walk out understanding how much planning, organization, and communication is essential to every aspect of the job while making your job life easier.

**IN THIS COURSE**

We will cover topics such as:

- Organization stops treasure hunting in the field
- Information transfer is a key to success
- Material expediting is the heart of your job
- Giving clear and precise directions on a weekly basis
- Getting the Steward involved with manpower coordination
- Sit down with your team and explain the operation system you're installing
- No question is a stupid question - not asking the question is stupid
- Safety is everyone's responsibility
- UA Standard of Excellence is to be reviewed
- Apprentices are to be used effectively

**PREREQUISITES**

None

**A lifetime of empowerment**
