ABOUT ME

As a third generation Steamfitter and with 30 years in the field, I felt it was time to give back in the classroom. Experiencing everything from two man welding jobs to GF on large scale projects has given me insights on how important a schedule can be on any scale.

Job Site Scheduling

Journey Level Continuing Education

Fall Semester 2021
November 11 - December 2, 2021
Tuesdays & Thursdays 5PM - 8PM
6 NIGHTS

Job Site Scheduling

This class will be taught live on the Zoom platform

COURSE DESCRIPTION

Often journeymen are asked to step up and take charge, but we are not always given what we need for that to happen. One example is scheduling. This class is designed to teach you practical skills so that you can figure out where your job is at, how to get things moving, and keep them moving. Topics include scheduling manpower, ordering materials, tracking tasks, and how to handle the weekly meetings.

OUTCOMES

By the end of this class you will have the basic knowledge needed to create a schedule and know how to make changes on the fly when that schedule goes out the window.

IN THIS COURSE

We will cover topics such as:

What is scheduling?

- Nuts and Bolts
- Methods
- Building
- Aaaaaand GO!

Nuts and Bolts

- Priorities
- Long lead/special times
- T.I.M.E.
- You want it when?

Methods

- The dreaded Bar Chart
- Poster Boards & Sticky Notes
- Critical Path/Push/Pull
- Which program to use?

The Build

- Setting Dates
- Lean Method/Placing Manpower
- Delivery Day
- Have I got a Schedule to sell you...

And it falls apart. Now what?

- Weekly meetings
- Change Orders
- RFIs
- The Look Ahead

Love it when a plan comes together!

- Reduction of force
- Roll Back
- Are we there yet? The Punchlist

PREREQUISITES

None

A lifetime of empowerment
